SLIM-LINE

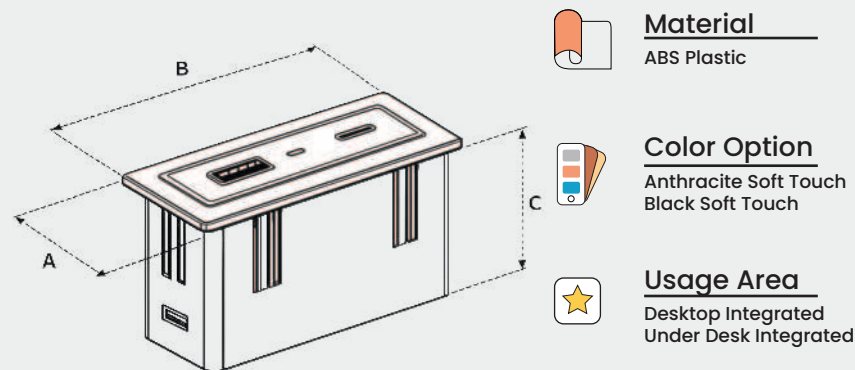

USB A/C Charging Unit

Slim-Line Modular Dual USB-A/C Charging Socket system meets your needs in every setting with its easy operation, simple installation, high performance, and exceptionally elegant design. Designed for comfortable use on all types of furniture in your office, home, or public spaces—whether on desks and other hard surfaces or on soft surfaces such as fabric and leather—Slim-Line also delivers high performance with its fast-charging capability.

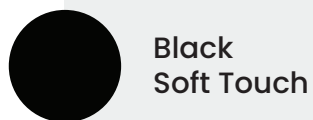

Easy Installation & Premium Design

Slim-Line is a practical product that can be easily mounted onto your desk, countertop, or any preferred application area. Its stylish design, ease of use, and high-performance structure ensure that it fully meets your connection socket requirements.

CORNER-LINE

Corner Socket System

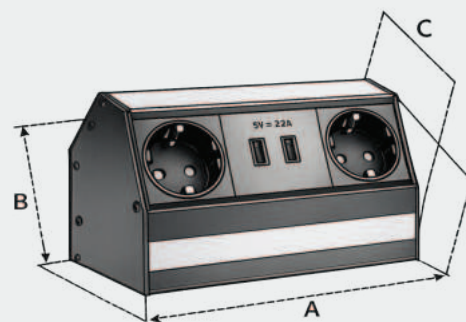

The Corner-Line corner socket efficiently utilizes unused corner spaces, making it ideal for kitchens, bathrooms, laundry areas, laboratories, drawers, and more. It combines practicality with a sleek design, featuring anodized and electrostatic powder-coated finishes.

Enhanced with accessories like a hanger set and phone shelf, it offers added convenience—making it far more functional than a standard socket.

Hanging and Shelf Accessory

The Corner-Line Shelf lets you safely charge your phone while cooking or cleaning, protecting it from kitchen hazards. The Corner-Line Hanger is ideal for hanging frequently used utensils like ladles, strainers, and skimmers, keeping your space organized and convenient.

WIRELESS CHARGER

Wireless Charger Unit

The Wireless Charger will bring ease to your life with its practical structure and elegant design. It combines all the features you need, including: 15W Fast Charging capability. Type-C and USB 3.0 ports.

Flexible Area of Use, Easy Installation

You can easily integrate your charger into any area you need, making it easier to use with your furniture, and on your home and office desks.

SOLE-LINE

Rotating Socket System

The Sole-Line rotating desktop socket system provides ease of use through its rotating socket mechanism. With a simple movement, you can rotate the socket system and access the recessed power outlets on your meeting table whenever needed. Thanks to its compact design, the desktop socket system remains flush with the table surface both during use and when not in use, giving your office furniture a modern appearance.

MOBILE-TV LIFT_{MET-X-01}

Movement System

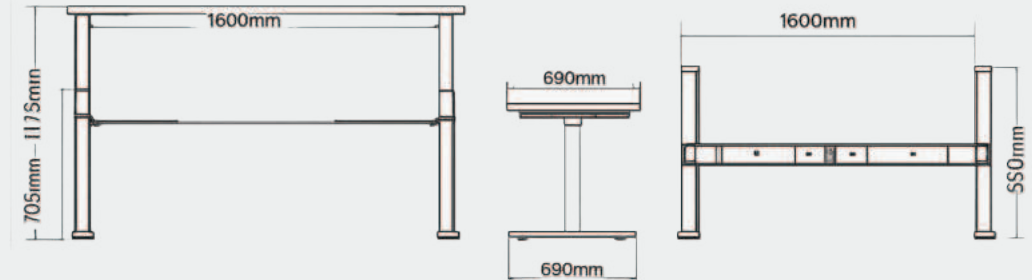

The memory-enabled remote on the Mobile Desk System allows you to adjust the desk height according to your preference and save these settings. With the Mobile Desk System, you can switch your desk to a standing position anytime during the day while working.

Flexible Use

The Mobile TV Stand is specially designed to fit all televisions between 42 and 65 inches. Its portability and adjustable height allow you to hold your meetings and presentations in any location and exactly the way you want

- Supports TVs from 42" to 65"
- 65 cm vertical movement range
- Compatible with VESA standard TV mounts
- Wheeled, mobile base
- Adjustable height via control buttons

MOBILE- DESK

Height- Adjustable Desk System

The memory-enabled remote on the Mobile Desk System allows you to adjust the desk height according to your preference and save these settings. With the Mobile Desk System, you can switch your desk to a standing position anytime during the day while working.

- Functional and stylish design
- Control option with memory-enabled remote
- Lifting capacity up to 160 kilograms
- Designed to fit standard tabletops
- Safe movement feature

Benefits of Working While Standing

Be More Energetic

Work More Efficiently

Ensure Sitting Ergonomics

Live Healthier

Silent Motor

Load Capacity

Create Healthy Work Environments

The human body is not designed for long periods of sitting. Studies show that to stay healthy, we need to minimize the time spent sitting. That's why we designed the smart desk leg for you. With its adjustable height, it allows you to set the desk according to your sitting ergonomics and gives you the option to work standing whenever you want. This helps prevent the negative effects associated with prolonged sitting.

Freedom of Movement

With a lifting capacity of 80 kg per leg, totaling 160 kg, it is compatible with all standard tabletops. Its quiet motor creates a comfortable working environment, while the functional and stylish design adds a modern touch to your workspace. The adjustable height provides you with freedom of movement
